

Instructions:

Kindly study the provided designs. As part of the development task, you would need to build these for Mobile view.

Instructions:

1. Please refer to the “Dashboard - UI” to build the dashboard. Please try to match the UI as close as possible on this screen.
2. Once the user clicks “Activate Now” on the dashboard, the pop up comes. Please build the form with the fields as per the UI.
3. Please implement validations for Phone number and Email.
 - a. Phone number should start with +91 and should be followed by 10 digits. If validation is successful, show the green tick mark as indicated on the UI. If the validation fails, do NOT show any message.
 - b. Email Address should have necessary characters like @ followed by some text followed by .com. If validation is successful please tick mark, else do NOT show any message.
4. On clicking the cancel button or Activate Button, take the user back to the dashboard screen.

Evaluation Criteria:

1. 60% weightage is to the functionality, and 40% weightage to the UI match with the shared designs.
